Jzeff Kendrew Somera

AI Engineer · Full Stack & Blockchain Developer

Pasig City, Philippines jzeffsomera@gmail.com +639210900799 zeff.tech linkedin.com/in/jzeffsomera github.com/Zeff01

PROFILE

Senior full stack and AI engineer with 5+ years building web, mobile and blockchain products across the UK, US and Australia. Recent work includes Halrcall, an AI marketing automation platform, RepairCoin, a blockchain and AI rewards ecosystem, and AskLuci, a clinic engagement platform. The core stack spans TypeScript, Next.js, React, React Native, Node and OpenAI, with Supabase, AWS and Solidity for data, cloud and smart contracts. Founder of Codebility, a community of over 120 developers.

20+ Satisfied Clients **40+ Projects Completed** **5+ Years of Experience** **100+ Interns Mentored** **86 GitHub Repos**

EXPERIENCE

Full Stack Developer · Halrtech 2026
United Kingdom

- Built Halrcall, an AI marketing automation platform that autonomously creates and runs ad, marketing, sales and follow-up campaigns
- Designed the full stack for autonomous campaign creation and execution in the UK

Full Stack Developer / Mobile Developer · FixFlow 2025 – 2026
US

- Built RepairCoin, a blockchain and AI rewards ecosystem where customers earn rewards, make payments and redeem tokens
- Shipped AI-assisted marketing, customer management and service sales tools for repair shops, plus a React Native mobile app

Full Stack Developer · Physiocall 2025
Australia

- Built AskLuci, a clinic engagement platform for a 2025 healthcare challenge that rallied clinics toward a collective one-million milestone
- Integrated member and admin portals with GoHighLevel

Full Stack Developer · Stanton 2025
US

- Built a suite of internal operations platforms for a real-estate firm spanning construction, maintenance, payroll and utility management
- Integrated operations platforms with AppFolio and RingCentral on a Next.js, React, TypeScript and Supabase stack

Full Stack Mobile Developer · Compound 2024
United Kingdom

- Delivered the Compound mobile app, a UK pension platform that simplifies pension management for users
- Leveraged AWS for scalable cloud services and a secure, reliable backend infrastructure

Full Stack Developer · Volatility 2024
Australia

- Delivered responsive front-end interfaces and robust back-end services for a trading platform using React.js, Next.js and Node.js
- Built seamless user experiences for financial market applications
